

Jenkins backup:

[] install **Thinbackup** plugins.

[] go to manage jenkins go down we get Thinbackup options in tools and actions.

[] create one directory path example: mkdir var/home-jenkins/backup and give chmod 777 var/home-jenkins/backup.

[] go to manage jenkins select Thinbackup , in settings give path of directory to store backup (var/home-jenkins/backup).

[] select options which are we want.

[] click backup check the mentioned path we will get the backup file.

[] to check.

[] delete jobs and create jobs.

[] click restore button then stop and start the Jenkins.

[] we get deleted jobs and newly created jobs.
