

for new server

[]login to server

[]check the jenkins users is created or not if not create jenkins users

[]useradd -m jenkins

[]passwd jenkins (create password)

[] usermod -aG sudo jenkins (give sudo permission )

to add slave in jenkins, we will create credentialsmeans <> manage jenkins <>

credential<>add credential<> give IP and password (which we create password for jenkins user in server)

Name ?

15.204.241.221

Description ?

15.204.241.221 port 6685

Plain text [Preview](#)

Number of executors ?

3

Remote root directory ?

/home/jenkins

Remote root directory ?

/home/jenkins

Labels ?

ida-pt

Usage ?

Only build jobs with label expressions matching this node

Launch method ?

Launch agents via SSH

Host ?

15.204.241.221

Credentials ?

jenkins/\*\*\*\*\* (StL#@2025)

+ Add

jenkins/\*\*\*\*\* (StL#@2025)

+ Add

Host Key Verification Strategy ?

Manually trusted key Verification Strategy

Require manual verification of initial connection ?

Advanced ▾

Edited

Availability ?

Keep this agent online as much as possible
